Amendments to the Claims:

1-24. (canceled)

25. (new) Method for arc welding with a consumable electrode under a protective gas, comprising the steps of:

providing a first part made of ductile cast iron and a second part made of ductile cast iron or steel to be joined;

providing a protective gas contains at least one of carbon dioxide in a range of 1 to 25 vol% and oxygen a range of 0.5 to 10 vol%, and the remaining volume of protective gas comprises one of argon and an argon-helium mixture; and

arc welding the first and second parts together with the consumable electrode under the protective gas.

- 26. (new) Method as claimed in Claim 25, wherein two welding wires are used in the arc welding step to produce the joint.
- 27. (new) Method as claimed in Claim 25, wherein carbon dioxide is added to the protective gas in an amount of 1 to 15 vol%.
- 28. (new) Method as claimed in Claim 25, wherein carbon dioxide is added to the protective gas in an amount of 2 to 10 vol%.

- 29. (new) Method as claimed in Claim 25, wherein oxygen is present in the protective gas in an amount of 1 to 3 vol%.
- 30. (new) Method as claimed in Claim 25, wherein nitrogen monoxide is additionally added to the protective gas.
- 31. (new) Method as claimed in Claim 25, wherein helium is present in the protective gas at 10 to 60 vol%.
- 32. (new) Method as claimed in Claim 25, wherein helium is present in the protective gas at 20 to 50 vol%.
- 33. (new) Method as claimed in Claim 25, wherein helium is present in the protective gas at 30 to 40 vol%.
- 34. (new) Method as claimed in Claim 25, wherein a corona arc is used in the arc welding step.
- 35. (new) Method as claimed in Claim 25, wherein a free electrode length of at least 15 mm is used.
- 36. (new) Method as claimed in Claim 25, wherein pulsed arc welding is used in the arc welding step.

- 37. (new) Method as claimed in Claim 25, wherein a wire feed rate of 10 to 50 m/min is used in the arc welding step.
- 38. (new) Method as claimed in Claim 25, wherein a wire feed rate of 15 to 30 m/min is used in the arc welding step.
- 39. (new) Method as claimed in Claim 25, wherein a wire diameter of 0.8 to 2.0 mm is used in the arc welding step.
- 40. (new) Method as claimed in Claim 25, wherein a wire diameter of, 1.0 to 1.6 mm is used in the arc welding step.
- 41. (new) Method as claimed in Claim 25, wherein an arc voltage of more than 28 V is used in the arc welding step.
- 42. (new) Method as claimed in Claim 25, wherein an arc voltage in a range of 32 V to 45 V is used in the arc welding step.
- 43. (new) Method as claimed in Claim 25, wherein a current of 220 A to 500 A is used in the arc welding step.

- 44. (new) Method as claimed in Claim 25, wherein a current of 260 A to 450 A is used in the arc welding step.
- 45. (new) Method as claimed in Claim 25, wherein the first and second parts are joined by a weld joint created from at least two weld layers in the arc welding step.
- 46. (new) Method as claimed in Claim 25, wherein at least the ductile cast iron parts are preheated to temperatures of 200°C to 250°C before the arc welding step.
- 47. (new) Method as claimed in Claim 25, wherein the joined parts are cooled in diatomaceous earth after the arc welding step.
- 48. (new) Method as claimed in Claim 25, wherein the joined parts are heated to temperatures between 500 and 900°C for 1 to 3 hours after the arc welding step.
- 49. (new) Protective gas mixture for arc welding of ductile cast iron with a consumable electrode, comprising:
- at least one of carbon dioxide in a range of 1 to 25 vol% and oxygen a range of 0.5 to 10 vol%; and

one of argon and an argon-helium mixture.

- 50. (new) Protective gas mixture as claimed in Claim 49, wherein the protective gas contains 1 to 15 vol% carbon dioxide.
- 51. (new) Protective gas mixture as claimed in Claim 49, wherein the protective gas contains 2 to 10 vol% carbon dioxide.
- 52. (new) Protective gas mixture as claimed in Claim 49, wherein the protective gas contains 1 to 3 vol% oxygen.
- 53. (new) Protective gas mixture as claimed in Claim 49, wherein the protective gas contains nitrogen monoxide.
- 54. (new) Protective gas mixture as claimed in Claim 49, wherein the protective gas contains 10 to 60 vol% helium.
- 55. (new) Protective gas mixture as claimed in Claim 49, wherein the protective gas contains 20 to 50 vol% helium.
- 56. (new) Protective gas mixture as claimed in Claim 49, wherein the protective gas contains 30 to 40 vol% helium.
